

Order Sets

Clinical decision support for quality care

Order Sets integrates with your EMR to provide clinicians with the latest knowledge, enabling them to consistently provide best-practice care.

Smarter Clinical Order

Industry-leading library of over 1,000 reference order sets kept updated with the latest medical knowledge by our clinical team.

Collaborative clinical network connects you with global order set authors so you can learn from international peers.

Seamless integration with existing electronic medical record systems.

Unlock strategic and operational insights with analytics using clinical ordering data from across your organisation or health system.

World-class support team makes it easy to deploy clinical content at scale and deliver high-impact benefits.

Key Benefits

Standardise clinical decisions to best practice across your organisation

Reduce unwanted variation in clinical practice while supporting quality improvement

Better align your care to health protocols and guidelines

Supports more efficient care and strategic health system priorities
