Progress Notes

Structured clinical documentation for exceptional patient-centred care

Progress Notes structures how you record and manage patient documentation with standardised modules that consolidate care decisions in an accurate, accessible, and actionable digital note.

thinkresearch

Key Features

Capture patient information in a **structured knowledge-based format** with embedded clinical decision support for best-practice care.

Eliminate the problems of handwritten documentation, including legibility, incompleteness, and resulting care-quality issues.

Enable quicker clinical insights, enhanced care team collaboration, and access updated provider observations in a streamlined, easy-to-scan format.

Align with our **leading reference library of clinical modules** with standard medical terminology, enabling discrete linking between treatment and diagnosis.

Generate data-derived insights across health systems and organisations through embedded real-time analytics.

Key Benefits

Saves clinicians' time by highlighting key details and eliminating redundant information

Reduces time spent searching for information and expedites patient hand-offs and transfers

Minimises administrative overhead with structured information and billing codes
