

Award-winning, trusted telehealth platform

VirtualCare makes it easy for clinicians and healthcare providers to safely and effectively treat patients remotely

VirtualCare Features

Flexible Communication: Secure messaging, video and audio communication, with ability to upload attachments, through a computer or Android/Apple devices.

Modular Workflows: Provides a wide range of triage, assessment and workflow functionality based on feedback from clinicians.

Ironclad Security: Features enterprise-grade privacy and security and complies with Canadian privacy laws and European Union GDPR.

Clinical Insights: Powerful analytics dashboards enable vital reporting and data visualisation, helping you monitor patients.

Open and Interoperable: Integrates with a variety of existing clinical information systems, and can be customised to your needs.

Scalable and Reliable: Infrastructure scales to handle hundreds of new providers and patients. One of Canada's most used telemedicine platforms.

Easily Onboard Your Organisation or Clinic

Easy to use but versatile for providers and patients

Adapts to different workflows and clinical protocols

Helpdesk support available 24/7

Winner of the 2019 Canadian Health Informatics Award for Patient Care Innovation
