

eForms

ADDRESSING WORKFLOW CHALLENGES ACROSS THE CONTINUUM OF CARE

Customize

Centralize

Optimize

Transform

eForms are designed to streamline the key processes and workflows within your organization, allowing clinicians and allied health professionals to capture, share, review and complete an endless number of digital forms in just a few clicks. The result is reduced cost, optimized workflows and a better care experience for patients.

TARGETING YOUR WORKFLOW CHALLENGES:

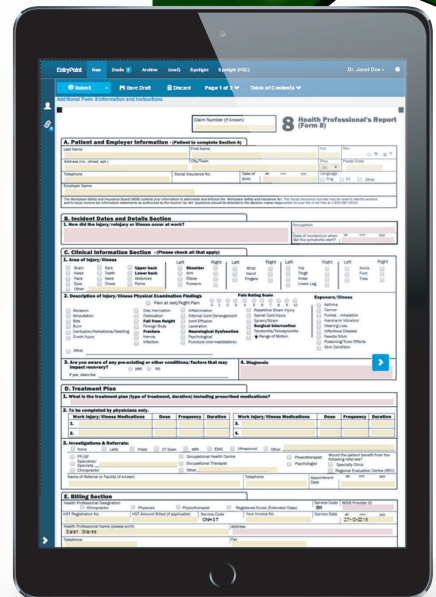

- **Medication Reviews**
Provide clinical assessments to patients through our digital forms
- **Incident Reporting**
Document and track patient incidents within your organization
- **Nursing Admissions**
Digitize admissions packages for faster and more accurate documentation
- **Audits**
Conduct and review your organization's performance and compliance

THE VALUE OF EFORMS

- Increases speed and accuracy in documentation
- Enables cost and resource efficiencies across an organization
- Improves staff experience and patient outcomes
- Provides real-time insight and analytics to improve decision making and track progress against quality improvement goals

KEY FEATURES

- eForms can be accessed directly at the point of care via any web-enabled device, with electronic signatures built into the application
- Embedded logic supports the decision making process
- Patient and organization information auto-populates
- Secure, HIPAA and PHIPA-compliant solution, with unlimited users and storage
