TxConnect

BUILDING COLLABORATIVE NETWORKS OF HEALTHCARE ORGANIZATIONS

TxConnect is a clinical content management system designed to make building, organizing and deploying Order Sets easy.

TxConnect provides access to thousands of expert clinical documents organized by library type department and therapeutic area.

- Compare clinical content used across facilities
- Direct access to the evidence behind order sets
- Explore related documents with just one click
- Search, view and request hundreds of current clinical document updates.

ACCESS TO OVER 10,000 MULTI-DISCIPLINARY CLINICAL DOCUMENTS

Join a network that's connecting thousands of clinicians with leading evidence-based clinical content.

TxConnect, allows all client organizations to search, view and request order sets used across their network.

KEY FEATURES

- Unprecedented accessibility to innovative knowledge and best practices as they are developed and implemented
- Expert team of researchers, physicians and nurses partnered with healthcare associations and industry thought leaders to incorporate the most up-to-date content
- Segmented libraries for post acute and long term care, surgery, nursing, ER etc.
