

VirtualCare™

Our award-winning telemedicine platform is trusted as an OTN Vendor of Record

Virtual visits are a safe and effective way to treat patients and help contain COVID-19. To help patients safely access care, Ontario's Ministry of Health has released new [billing codes for virtual visits](#).

Our telemedicine platform provides:

Flexible communication: Secure messaging, video and audio functionality with the ability to upload attachments.

Modular Workflows: We've developed a wide range of triage, assessment, and workflow functionality with feedback from clinicians.

Ironclad Security: Fully PHIPA-compliant and exceeds Ontario's legislated security requirements.

Clinical Insights: Powerful analytics enable vital reporting and data visualization, helping you monitor patients.

Open and Interoperable: Easily integrates with a variety of existing clinical information systems.

Scalable and Reliable: As one of Canada's most heavily used telehealth platforms, our cloud is ready for increased traffic as we onboard hundreds of new clinicians and patients.

Get your clinic or office onboarded in hours and:

- Batch invite your patients to join
- Access our helpdesk support 24/7
- Download and use our platform with Apple or Android devices
- Winner of the 2019 Canadian Health Informatics Award (CHIA) for Patient Care Innovation
