

Empowering Healthcare Providers With Digital Tools and Clinical Content For The Best Patient Care

About Think Research

Think Research is an industry leader in delivering knowledge-based digital healthcare solutions. Our mission is to organize the world's health knowledge so everyone gets the best care. We provide evidence-based healthcare technology solutions that support the clinical decision-making process, help hospitals standardize care, and improve patient health outcomes.

For over a decade, our cloud-based, EMR-agnostic digital tools have empowered clinicians around the world and positively impacted millions of patients across the continuum of care – including primary physician care, acute care hospitals, and surgical suites as well as community and seniors care. Think Research is proud to serve as a trusted health system partner to a rapidly growing, global client base.

Our Solutions

Think Research's solutions support healthcare organizations in achieving clinical excellence, meeting care quality and clinical standardization goals, and in the delivery of timely, cost-effective care.

Clinical Knowledge

Collaborative clinical decision support tools that deliver the latest clinical knowledge to the point-of-care in hospitals, long-term care, and in community care settings.

Connectivity Tools

Telemedicine software and digital referrals connecting clinicians remotely with their patients and with our clinical knowledge libraries, helping ensure best practice at the point of care.

Digital Clinic Services

Transforming medical clinics with digital-first solutions to streamline physician workflows and optimize billing.

Our Family of Companies

MD BriefCase

Provides accredited, online continuing professional development to help healthcare practitioners enhance their practice and stay current on the latest evidence and protocols.

oe Oncology Education

An MD BriefCase Company

Provides rich, timely and unbiased physician-authored resources to thousands of oncology professionals worldwide.

BioPharma SERVICES INC.

World-class contract research organization that specializes in clinical trials, bioequivalence studies and bioanalysis.

pharmapod™

Intuitive platform that enables pharmacists to capture and record medication-related incidents.

CLINIC 360

Innovative Toronto-based clinic offering cosmetic and gastric sleeve surgeries.

HEALTHCARE medical-centre

Network of medical clinics in the GTA offering walk-in, same-day and virtual appointments.

Our Products and Services

Order Sets

Order Sets structures clinical pathways at the point of care, helping clinicians treat patients faster while delivering exceptional outcomes. For organizations, Order Sets helps control costs and supports key strategic objectives while enabling clinical practice data and analytics insights. Order Sets is backed by Think Research's industry-leading library of reference order sets, kept updated with the latest medical evidence and customized for the needs of health sites.

VirtualCare

VirtualCare is a digital engagement platform that allows healthcare providers, specialists, allied health and community support workers to virtually visit with patients, clients, or residents through secure messaging or audio/video conferencing. It can embed clinical assessments and protocols to facilitate workflow, and helps clinicians to optimize their practice to see more people faster.

Decision Support Tools for Seniors Care

Decision Support Tools for Seniors Care provides long-term care and retirement home staff the confidence and tools to assess and treat residents, while also enabling virtual visits with physicians, mental health, and allied health professionals. Our tools guide staff through a series of evidence-based questions and pathways that result in a well informed resident-centred plan of care every time, and support improved resident safety.

eReferrals

eReferrals is a digital referral platform that enables hospitals, clinicians, specialists, community care, and medical service providers to send and receive secure and accurate patient referrals from within their existing EMR interface. Save time and dispatch referrals with peace of mind with eReferrals.

eForms

eForms is a digital form tool that replaces outdated paper forms with a comprehensive digital solution to easily capture patient or seniors care resident information while improving your form workflow. Unlock new efficiencies, reduce completion times and error rates, expedite consent capture, and strengthen compliance while reducing costs.

Progress Notes

Progress Notes helps frontline clinical teams align their documentation with best practice in a standardized digital note shared across all team members. Progress Notes features embedded best-practice guidance, helps eliminate "note bloat" with concise and accurate information, and reduces incidents of missing information with increased clarity that makes quick reads easier.
